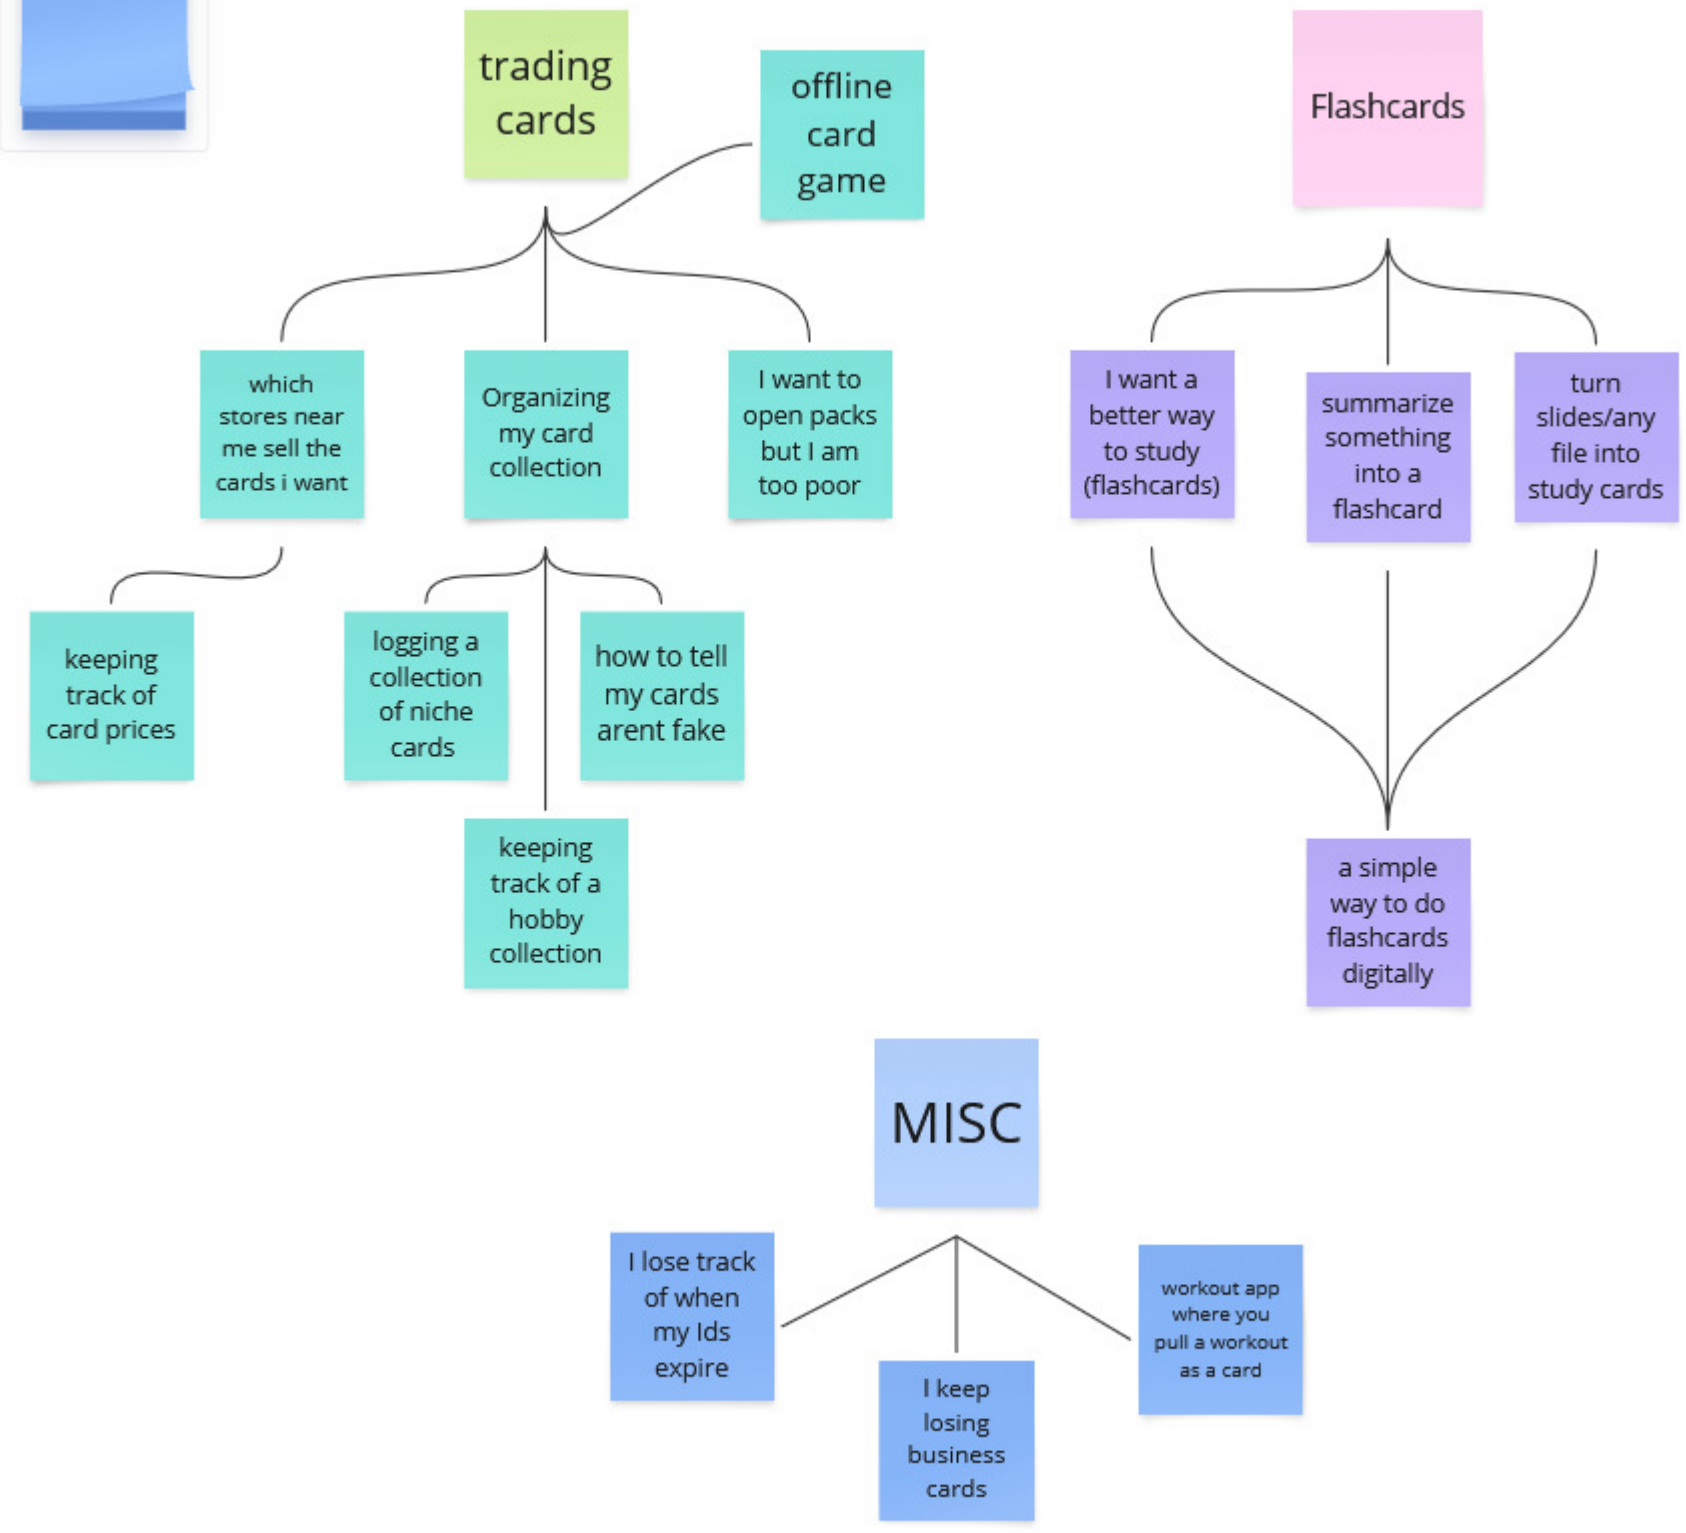
Problems

What is the problem? Why should we solve it now?



Audience

I'm a bird enthusiasts and I want cards for photos of birds I've taken

I get handed many business cards and lose them

I travel a lot and have many IDs/ Licenses that I forget expire

Who is this for?

Collection App

I'm a casual card collector and I want an app to organize my collection

I have been collecting pokemon cards since I was a little boy and have many cards and want to organize them

I collect a lot of cards and can't remember which ones I have

I'm a new card collector who needs to know if I'm getting scammed or not

Flashcard App

I'm a college student who wants a quick way to study

I'm a person who wants to learn a new language

I'm a professor that wants to create reviews for my students.

I'm a software developer who cant remember their syntax.

I'm a person who thinks typing a prompt is too much work to get a summary

I'm a med student who needs flashcards to keep up with fast paced learning.

I'm an actor that wants to practice my lines.

Game App

I am person motivated by rewards and want to gameify my daily tasks

I'm a person who enjoys opening card packs but doesn't want to actually pay for them

I'm a card game player and I want to test and build decks for my game

Solutions

How do we intend to solve for this?

Collection App

- add and create your own cards
- Tagging cards so that search is easy
- ability to organize cards through collections or decks
- Being able to sort cards by date added
- Price overview of a card from a certain market(s)
- Give a preview of the cards
- Take a picture of cards for custom cards
- A way to easily scan the cards or search for a digital version of it

Flashcard App

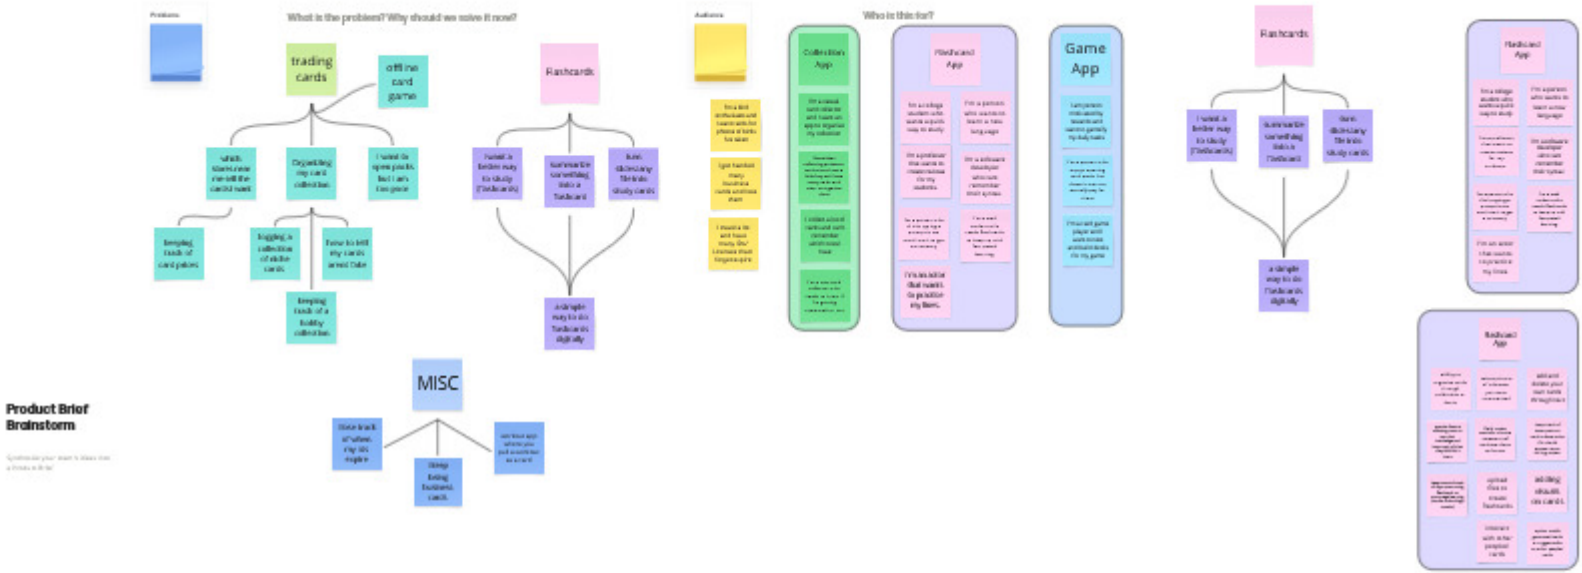
- ability to organize cards through collections or decks
- take a picture of whatever you want summarized
- add and delete your own cards through text
- practice feature allowing users to test their knowledge and keep track of what they did/didn't know
- Daily review sessions where a set amount of cards are shown to the user
- keep track of time spent on cards to determine if it should appear more during review
- keeps a count/streak of days spent using flashcards to encourage learning (similar to duolingo streaks)
- upload files to create flashcards
- adding visuals on cards
- interact with other peoples' cards
- option to edit generated cards or suggest edits on other peoples' cards

Game App

- Earn points that can be used to customize something or leaderboard
- Inventory that keeps track of the users' earned cards
- weekly/monthly/quarterly/yearly review of everything done

Product Brief Brainstorm

Synthesize your team's ideas into a Product Brief.



Problems
What is the problem? Why should we solve it now?
trading cards
offline card game
Flashcards
Keeping track of card prices
Keeping a collection of visible cards
Keeping track of a hobby collection
How to tell why cards are not fake
Turned a broken way to study (Flashcards)
Summarize something into a flashcard
Turn slides/any file into study cards
a simpler way to do flashcards digitally
MISC
Store track of values, may be maybe
Keep listing flashcard cards
